## Profile

---

Full-stack developer building things that are useful, fun, or both. I use AI tools with intention — grounded in fundamentals and designed for long-term maintainability. Built 10+ projects across web, automation, and bots. Always shipping, always vibing. (★^\_^★)

## Professional Experience

---

2021 – present

### Freelance Developer

- Built 10+ full-stack projects using **Next.js**, **Appwrite**, **Tailwind CSS**, **TypeScript**, and **Python**
- Developed Discord bots, CLI tools, and open-source automation utilities
- Integrated AI APIs and focused on maintainable UX in personal toolkits
- **Designed and delivered custom game systems in Roblox Studio** (Lua) for international clients, focusing on interactive mechanics and scalable architecture

## Side Projects

---

### E-commerce Website [🔗](#)

*Next.js / TypeScript / Tailwind CSS / Appwrite*

- A responsive storefront built for guest users to simulate shopping without login. Ideal for showcasing products with smooth UI/UX across devices.

### Threads Clone [🔗](#)

*Next.js / TypeScript / Tailwind CSS*

- Cloned Threads UI including homepage, 404 page, and auth flow (in development). Backend planned with Appwrite.

### What to eat today [🔗](#)

*Next.js / TypeScript / Tailwind CSS / FoodPanda Web Scraping*

- Helps users decide what to eat. Users input a location, and the app fetches FoodPanda listings, randomly recommending 3 nearby restaurants.

### Dog-Hub [🔗](#)

*Next.js / TypeScript / Tailwind CSS*

- A fun app that lets users swipe through random dog images with Tinder-style UI. Designed for laughs and good vibes.

### osu! Song Backup Tool (Open Source) [🔗](#)

*Python*

- Scans local osu! maps and saves metadata as CSV for batch download, backup, and sharing. CLI-based, highly customizable.

## Courses

---

2024 – present

### The Ultimate Next.js 15 Course [🔗](#)

*JSM Masterclass Experience*

Built production-grade full-stack apps with Next.js, covering frontend performance, auth systems, and scalable project structure.
